

Our Promise to You Commitment To Service

Clean and white with blue trim, L.A. Roofing Materials' fleet has been servicing all of Southern California from our Los Angeles facility for more than 30 years just for you.

L.A. Roofing Materials' equipment and professional drivers go most anywhere and can reach most any roof. We have trucks with hydraulic conveyors, towable forklifts and tractor trailers. Size of course is everything. That's why we have our *SuperLoader* truck & conveyor, the first ever, built by us to reach tall commercial buildings. Our forklifts can fit under most carports, so you won't need to load a detached residential garage by hand. To manage your schedules, our tractor trailers picks up all local materials.

We have expanded our fleet to include our Boom Truck which will lift and load material like rolls of singleply TPO, PVC & EPDM plus it's perfect for loading standing seam metal roofs. Plus we are the only Distributor with our own railroad!

Ask any of our long time customers and they'll tell you we can handle any size job for commercial built-up projects or residential roofs. We are experienced in handling all types of material, including blending clay & concrete tile.

From North to south and east to west, our Co-op, Nemeon allows us to reach anywhere in the United States. We are experts in shipping overseas.
